ABSTRACT

This is the 16th in a series of studies in educational philanthropy conducted by the Council for Financial Aid to Education since 1954-55. Roughly 1,000 institutions of higher education, both public and private, and 300 independent schools supplied the figures on which this report is based. This survey provides information on the voluntary financial support of educational institutions by source, purpose, and type of institution. Among the highlights of the report are that total support was down from 1973-74; support of private institutions was down although support was up for public institutions; support from individuals and foundations were both down; and, although the support for current operations was up 5 percent over 1973-74, giving for capital purposes, including endowment, was down by more than 15 percent. An appendix contains summary tables by class of institution. (Author/IRT)

VOLUNTARY SUPPORT OF EDUCATION 1974-75

Prepared by the Council for Financial Aid to Education and jointly sponsored by the Council for Advancement and Support of Education
the Council for Financial Aid to Education and the National Association of Independent Schools.

Highlights

HIGHER EDUCATION

Total voluntary support declined 3.6% in 1974-75. This marks only the second occasion since 1957-58 when voluntary support recorded a decrease, and, like the previous downturn in 1969-70, it coincided with a recession in the national economy.

Total Support Declines. Estimated voluntary support received by all institutions of higher education was $2.160 billion in 1974-75, as compared to $2.240 billion in 1972-73 and 1973-74.

Private Institutions Down; Public Institutions Up. Most of the overall decrease in support in 1974-75 was reported by the major private universities, but all classes of private institutions received less and as a group the private colleges and universities reported a decline of 6.4%. Public institutions received 9.4% more support in 1974-75.

Support from Foundations and Individuals Down. Among donor groups, there was decreased support from foundations and individuals, both alumni and non-alumni. Foundations were off 7.6%; individuals, 5.7%. However, alumni support of Annual Funds gained in number and amount. There was a small gain in support from business corporations and other sources.

Current Giving Up; Capital Support Down. Voluntary support for current operations gained more than 5% over 1973-74, and accounted for a record 60.9% of the total support. Giving for capital purposes, including endowment, declined by more than 15%.

Bequests Drop Sharply; Deferred Giving Up. Most of the decline in voluntary support from individuals appears to have been due to a 20% decrease in the value of bequests. Deferred giving recorded a small increase. College and university endowments were up in both book and market value.

The number of colleges and universities participating in the 1974-75 Survey was 986, 2 less than in 1973-74. The year-to-year trends and other comparative findings are derived primarily from an analysis of data supplied by 827 institutions that took part in both the 1973-74 and 1974-75 Surveys.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

The 207 independent schools that reported in both the 1973-74 and 1974-75 Surveys received 10.6% less support in 1974-75 than in 1973-74. Virtually all of the decline is attributable to decreased capital gifts by individual donors; there was a modest increase in current support and in Annual Fund support. Foundation grants increased and there was a large gain from "other" sources.

Additional copies at $8.00 per copy prepaid are available from the Council for Financial Aid to Education, 680 Fifth Avenue, New York, New York 10019.

PREFACE

The *Survey of Voluntary Support of Education, 1974-75*, is the 16th in a series of studies in educational philanthropy conducted by the Council for Financial Aid to Education since 1954-55. The Council for Advancement and Support of Education (which resulted from the merger of the American Alumni Council and the American College Public Relations Association) has assumed the co-sponsorship of the Survey that had been held by the American Alumni Council since 1965-66. The National Association of Independent Schools became a co-sponsor in 1967-68. This cooperative arrangement has resulted in a single survey that has become the only authoritative source of information on the voluntary financial support of educational institutions, by source, by purpose, and by type of institution.

The historical record of these Surveys and an analysis of institutional participation in the 1974-75 Survey appear in the Appendix on page 64. The number of participating colleges and universities was 986, only 2 less than in 1973-74, but about 6% less than the average for the preceding ten years. The number of independent school participants was down 13% from 1973-74 and significantly smaller than in previous years.

In the two decades since 1954-55, these Surveys have become increasingly accepted as important sources of information to donees and donors alike. The willing cooperation of roughly 1,000 institutions of higher education and 300 independent schools in supplying the figures on which these reports are based is an indication of the value of this information to development officers, alumni secretaries, and others concerned with institutional advancement. Foundations, corporations, church bodies, and others outside the educational community have similarly come to value these reports as sources of essential data in planning their policies and programs of educational support. The validity of the Survey information, however, depends on the rate of institutional participation. For the Survey's third decade it is hoped that new record numbers of colleges, universities, and schools will take part in this annual undertaking.

The definitions used in the 1974-75 Survey are the same as those used in 1973-74 and prior years. Voluntary support, as defined in *Gift Reporting Standards*, excludes income from endowment and other invested funds as well as all support received from Federal, state and local governments and their agencies; in editing the questionnaires, the CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory, 1974-75*, published by the U.S. Department of Health, Education, and Welfare, National Center for Education Statistics.

Since 1965-66, the Survey information has been processed by electronic computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy in accord with any expressed interest in the subject.

The data in this report are the result of countless hours of work by many individuals. To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, the CASE, the CFAE, and the NAIS would like to express their continued gratitude.

Higher Education

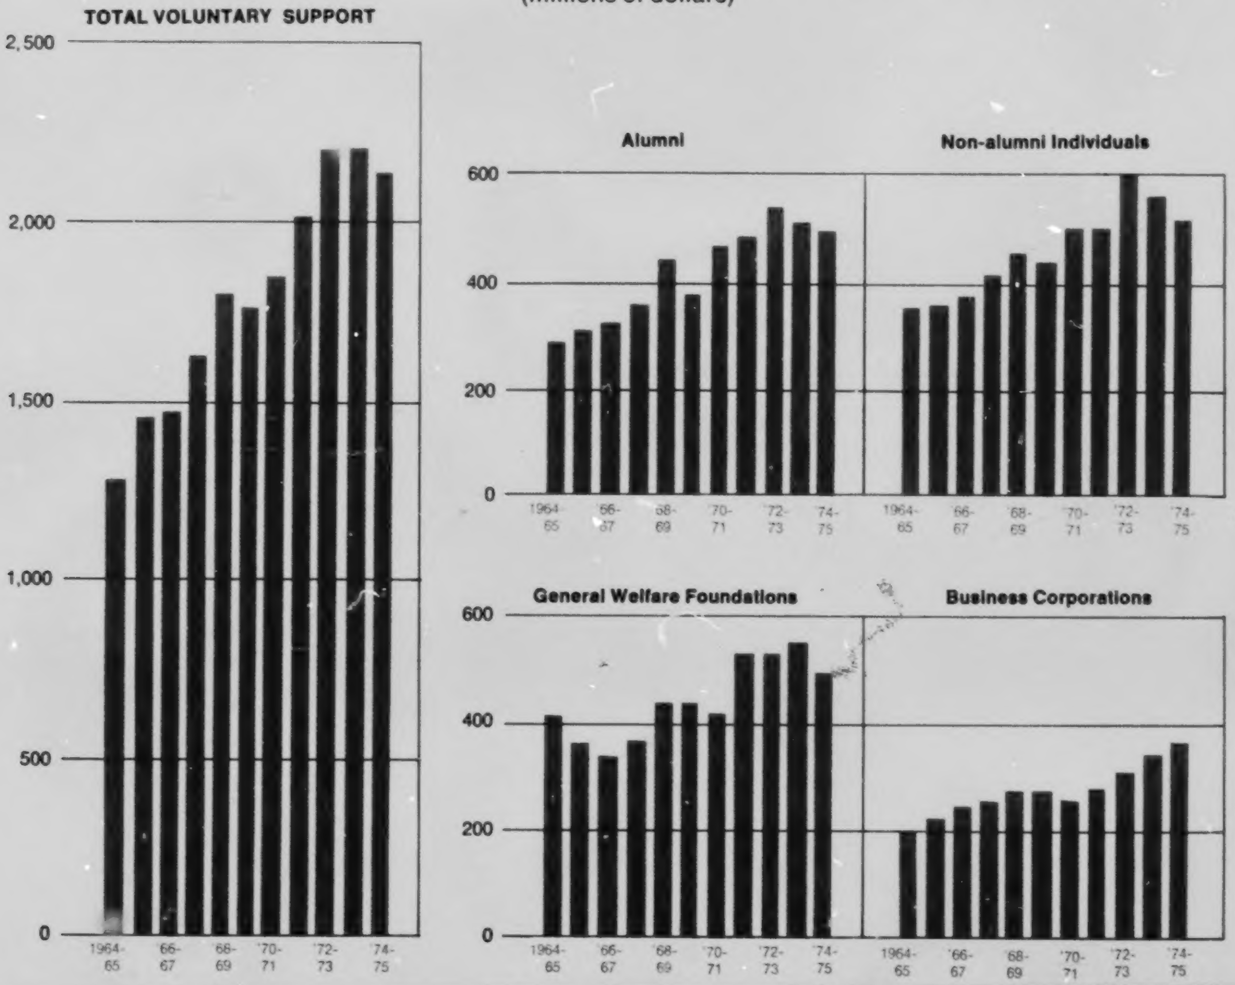
NATIONAL ESTIMATES

The voluntary support of colleges and universities was about 3.6% less in 1974-75 than was estimated for 1972-73 and 1973-74. The decrease reflects lower levels of support from foundations, individuals, and church sources; there was a small increase from business corporations and a large gain from "other" sources.

The data from the Survey of Voluntary Support of Education, in conjunction with other information, indicate that the voluntary support of the institutions of higher education decreased slightly in 1974-75. The CFAE estimate of total support in 1974-75 is $2.160 billion, about 3.6% less than the $2.240 billion estimated for each of the two preceding years. This marks only the second occasion since 1957-58 when voluntary support recorded a decrease, and, like the previous downturn in 1969-70, it coincided with a recession in the national economy.

Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total

(millions of dollars)



The dollar decrease in 1974-75 was accounted for by reduced support from foundations and individual donors, both alumni and non-alumni. As indicated on the accompanying chart and by the estimates given in Table 1, the decrease in foundation grants to colleges and universities in 1974-75 amounted to more than $35 million, or 7.1%, while individual giving declined nearly $65 million, or 5.9%. Support from non-alumni individuals fell 7.2%, while alumni gifts were off 4.5%. Virtually all of the decrease in individual support in 1974-75 is attributable to a 20% decline in the level of bequests. The voluntary support received from religious denominations was down by 3.4%. By contrast, there was a small increase, 0.8%, in the amount received from business corporations, and the support attributed to other groups and sources increased by more than $20 million, or 12.9%.

THE ECONOMIC FACTOR IN VOLUNTARY SUPPORT

In the past two years there has been a marked shift in the relative importance of the major and minor sources of voluntary support. Historically, the support received from foundations and individuals has accounted for between 70% and 75% of total support, and in 1971-72 and 1972-73 these sources accounted for 74.1% of each year's total. Between 1972-73 and 1974-75 support from foundations and individuals declined nearly $160 million, or 9.6%, and as a share of total estimated support declined to 69.4%, the lowest level since 1962-63.

The cause of this development appears to lie more in the changes in external economic circumstances than in changes in donor commitments. Specifically, the stock market decline between 1972-73 and 1974-75* is believed to have reduced the required payouts of private foundations and to have induced individuals to postpone major gifts of appreciated securities.

---

* One indicator of stock values, the Dow Jones Industrial Average, had a high of 1,051.70 and a low of 869.13 during the academic year 1972-73; during 1974-75 the high was 878.99 and the low was 577.60. The decline from the 1972-73 high to the 1974-75 low amounted to 45.1%.

The payout requirement assessed against private foundations by the Tax Reform Act of 1969 is defined as the foundations' minimum investment return or adjusted net income (whichever is larger), less certain taxes. Since the minimum investment return is based on the market value of net foundation assets, it is clear that a decline in stock prices would result in a decline in the annual payout requirement. The inference is that foundation support of higher education decreased from a relatively high level between 1971-72 and 1973-74 to a somewhat lower level in 1974-75 because of a decrease in total foundation grants caused by such a decline in the payout requirement.

Support of higher education by individuals (alumni and non-alumni) appears also to have been adversely affected by the two-year stock market decline. As indicated by the data in Table 1, such support fell from $1.136 billion in 1972-73 to $1.002 billion in 1974-75, a decline of $134 million, or 11.8%. A breakdown of these estimates by type of giving reveals that support for capital purposes decreased by $162 million, or 23.2%, and that this was partly offset by an increase in support for current operations in the amount of $28 million, or 6.4%. Further analysis of the fall in capital giving indicates that 30% of the decrease is due to a decline in the value of bequests, which are also subject to random variation, and that 70% of the decrease is due to a decline in outright and deferred capital gifts by living donors.

This two-year decline in capital gifts other than bequests amounted to an estimated $111 million, or 30.0%. Since this type of support is dominated by large gifts in the form of appreciated property, primarily securities, there is a strong presumption that the stock market decline during this period is the prime cause of reduced support from individuals. Donors of major gifts are known to be sensitive to timing, and it is logical to assume that a severely depressed stock market would induce many to postpone their support to a more favorable period.

VOLUNTARY SUPPORT DOWN ALSO IN RELATIVE IMPORTANCE

Although total voluntary support declined in 1974-75, student enrollment and general price levels continued to increase, with the result that total support per student in constant prices dropped by 17.5% and reached a new low; the cumulative decline since 1969-70 amounts to 30.1%. Total expenditures of colleges and universities show a 62.8% increase over the past five years; however, this is less than the combined effect of inflation and enrollment growth and this implies that expenditures per student in constant prices have decreased by 7.0% since 1969-70.

THE SURVEY RESULTS

VOLUNTARY SUPPORT, BY TYPE OF INSTITUTION

The institutions of higher education that took part in both the 1973-74 and 1974-75 Surveys reported a decrease of 3.1% in total voluntary support in 1974-75. All classes of private colleges and universities reported decreased support, while the public institutions tallied a substantial year-to-year gain.

For 1974-75, 986 institutions of higher education reported $1.675 billion in total voluntary support; this was about 4.1% less than the $1.747 billion reported by 988 institutions in the 1973-74 Survey. Some 827 colleges and universities took part in both the 1973-74 and 1974-75 Surveys; although 54.4% of the colleges in this group reported year-to-year increases, the dollar total of voluntary support showed a 3.1% decrease in 1974-75.

Tables 3a and 3b show the amounts of support, by class of institution. For all colleges and universities in the 1974-75 Survey, average support per institution amounted to $1,698,000, which was 4.0% less than in 1973-74. All categories of private colleges and universities reported decreases, while the public institutions reported a substantial increase. The basic Survey data are shown in Summary Table I on pages 58-59.

* Figures shown differ slightly from those published in the 1973-74 Survey Report; 5 institutions have been reclassified and the amount of support reported by them in 1973-74 has been allocated to the class in which they reported in 1974-75.

The relative experience of different classes of colleges and universities is best indicated by the 827 institutions that participated in both the 1973-74 and 1974-75 Surveys, as shown in Table 3b; further details, showing changes in voluntary support by source, are given in Summary Table II on page 60.

The private colleges and universities as a group reported $82 million, or 6.4%, less support in 1974-75 than in 1973-74, while the public institutions reported a gain of $31.5 million, or 9.4%. For both groups, however, the proportion of institutions with year-to-year increases was greater than in 1973-74.

A disproportionate part of the decrease, both for the entire sample and the private group, was accounted for by the major private universities. For these 68 institutions, total support in 1974-75 fell $55 million, or 7.9%, from 1973-74. They reported $34 million less from foundations, $15 million less from non-alumni individuals, $14 million less from alumni, and a small decrease from religious denominations. These losses were partially offset by a $5 million increase in business support and $3 million more from other sources.

For the 523 other four-year private institutions, total support declined $26 million, or 4.6%; about half of this decrease was accounted for by the professional and specialized schools. The 523 colleges received $26 million less from non-alumni individuals, about $3 million less from their alumni, $5 million less from business corporations, and slightly less from foundations; they received about $4 million more from religious denominations and a similar gain from other sources.

The 160 public four-year colleges and universities reported $31.5 million, or 9.4%, more support in 1974-75 than in 1973-74. They reported $16 million more from non-alumni individuals, $7 million more from business corporations, $4 million more from foundations and $6 million more from other sources; they reported about $1.5 million less from their alumni and a slight decrease in support from religious denominations.

The 76 community and junior colleges received about $1.3 million, or 8.5%, less support in 1974-75 than in 1973-74. Decreased support from individual donors and business corporations was partially offset by increased support from religious denominations, foundations, and other sources.

Among all the institutions taking part in the 1974-75 Survey, the 20 colleges and universities reporting the highest totals of voluntary support were:

VOLUNTARY SUPPORT, BY SOURCE

The decline of overall voluntary support was the result of decreased support from foundations and individuals, both alumni and non-alumni. Most of the decrease in individual support appears to have been the result of a sharp decline in the value of bequests. There was a small increase in support from business and a large gain in support from other sources

Tables 4a and 4b show the amounts of support by donor groups. As indicated in both tables, individuals' gifts and bequests and foundation grants decreased significantly in 1974-75, while there was a substantial gain in support from other groups and sources. Voluntary support received from business corporations and religious denominations, although down slightly for all institutions reporting, was up modestly for the 827 colleges and universities that took part in both the 1973-74 and 1974-75 Surveys.

A. In the listing on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for three reasons: (1) some multicampus institutions are shown in summary as well as in detail, (2) some of the component professional schools of major institutions are also listed separately, and (3) a few of the institutions not supplying complete information or reporting too late for computer tabulation are listed.

C. There were 64 institutions responding to the Survey invitation which are omitted from the tabulated data. These institutions include those which (1) were unable to supply any information, (2) received no support, (3) were unable to supply complete information, or (4) reported too late for computer tabulation. These institutions are listed separately on page 63.

The memorandum entries at the bottom of Table 4a show that most of the decrease in support from individual donors in 1974-75 was due to a 20.0% decline in the dollar value of bequests (see also page 56). A small decrease in current gifts by living donors was offset by a reported increase in deferred giving.

The most significant development revealed by the Survey is this decline in voluntary support received from individual donors. The 6.4% decrease reported in 1974-75 follows a similar decline in 1973-74, making a two-year decrease of about 12%. Economic factors appear to be responsible for an important part of this drop in individual support (see page 4).

As in 1973-74, decreased capital giving accounts for all of the decline in individual support in 1974-75. For all institutions reporting, capital giving by individuals was down $79.3 million, or 16.0%, while gifts for current purposes were up $26.1 million, or 7.8%. Excluding bequests, which decreased $53.3 million, or 20.0%, outright and deferred capital gifts by living donors fell $26 million, or 11.5%.

The decline in individual support in 1974-75 was widely spread among educational institutions. Reduced total support from alumni was reported by all classes of colleges and universities except the private men's and coeducational colleges, and lower levels of non-alumni support were reported by all categories except private women's colleges and public institutions. Although public colleges and universities reported an increase of 25.9% in support from non-alumni individuals, more than half of the year-to-year gain was reported by one institution as a single deferred gift from one individual.

For all institutions reporting, corporate support received through employee matching gift programs amounted to $11.8 million, an increase of $1.7 million over 1973-74. This sum was equal to 4.3% of total corporate support. The reported number of gifts matched rose 17.4% to 99,464, and the average match per gift was $118.35, virtually the same as in 1973-74.

The 827 colleges and universities in both the 1973-74 and 1974-75 Surveys reported an increase of $6 million, or 2.4%, in support received from business corporations. Although corporate support of private institutions was unchanged, the distribution by type of school was radically altered. Support of coeducational colleges was reduced $8.3 million, or 13.1%, while support of other classes of private institutions was increased by an equal amount. Corporate support of public colleges and universities rose $6.7 million, or 8.6%; support of the community and junior colleges fell $0.7 million, or 31.9%.

Foundation support of the institutions of higher education decreased $30 million, or 7.6%, in 1974-75. The major private universities received $33.8 million, or 16.4%, less from this source than in 1973-74, while the private professional and specialized schools reported a decrease of $9.1 million, or 35.4%. The private coeducational colleges received $8.0 million, or 11.5%, more than in 1973-74, and small increases were reported by private men's and women's colleges. Foundation support of public colleges and universities increased $4.4 million, or 5.8%, and there was a small gain for the junior colleges. (See Summary Table II.)

Support received by these 827 institutions from religious denominations increased roughly $4 million, or 5.1%. Virtually all of this increase went to private four-year colleges other than the major private universities. Support from other sources not identified rose $14 million, or 11.8%; all classes of educational institutions except private men's and women's colleges reported more support under this heading.

* It should be noted that the 1968-69 figure for total alumni giving includes one nonrecurring gift of $40 million.

The gain in current gifts by individual donors is reflected in increased alumni support of Annual Funds. Although there were 3.4% fewer colleges, universities, and independent schools reporting in 1974-75 than in 1973-74, the number of alumni donors to Annual Funds increased by 2.9%, and the dollar amount of their gifts increased by 5.0%. The average alumni gift to the Annual Fund, therefore, rose by 2.1%, to $70.58, an all-time record high. The participation rate remained constant at 17.7%. The historical data shown in Table 5 reveal an unbroken record of continuous growth in Annual Fund support both in total dollars and in size of average gift.

VOLUNTARY SUPPORT BY PURPOSE

The entire decrease in voluntary support in 1974-75 was accounted for by a decline in gifts for capital purposes; current support gained more than 5%. Support designated for research purposes rose significantly.

The distribution of voluntary support by purpose, as reported by all colleges and universities participating in the 1974-75 Survey, is shown in Table 6. As indicated, there was a decrease of $123 million, or 15.8%, in the amount of support received for capital purposes, including endowment. Current operating support, by contrast, increased nearly $51 million, or 5.2%, over 1973-74.

As a result of these changes, the relative importance of current and capital support has shifted dramatically. Current support accounted for 60.9% of overall reported support in 1974-75, as compared to 55.5% in 1973-74, while the proportion of total support designated for capital purposes fell from 44.5% in 1973-74 to 39.1% in 1974-75. Prior to 1969-70, capital giving typically accounted for more than 50% of total voluntary support.

The relative shift from capital support to current operating support affected every category of educational institution except the community and junior colleges, and the pattern applied to all classes of donors, as indicated in Table 7. For the private institutions, voluntary support for capital purposes has traditionally accounted for more than half of the total, but in the past two years it has fallen below 50% for all five classes of institutions. Taking all private colleges together, capital support in 1974-75 was only 43.9%, a new record low. By contrast, the public institutions have traditionally received more for current operations than for capital purposes, and in 1974-75 current operating support rose to 74.2% of their total support, which is a new record high.

Among donor groups, the basic patterns remained largely unchanged. Foundations, corporations, religious denominations, and other sources of support have typically favored current operating support over capital giving, and this pattern was substantially reinforced in 1974-75. Individual donors, on the other hand, have traditionally given more for capital purposes than for current operations. While this continued in 1974-75, the margin of difference virtually vanished. Alumni support for capital purposes fell from 57.7% to 50.7%, the lowest level on record. For non-alumni individuals, capital gifts declined from 61.6% to 55.9% of the total, also a record low.

Unrestricted giving continued to account for nearly one-third of total voluntary support, although there was a decline of 6.9% in such gifts in 1974-75. Among the designated purposes of support, the only gain was for research purposes, 10.2%. All other restricted giving decreased, and the largest decline, 14.4%, applied to physical plant funds.

BEQUESTS, DEFERRED GIVING AND ENDOWMENT FUNDS

Bequests decreased 20.0% in dollar amount, and from 32.2% to 27.5% of total voluntary support received from individual donors. Deferred giving recorded a moderate increase. The book value of endowment funds rose to a new record high, and there was a significant gain in market value.

Table 8. *Forms of Individual Giving as a Percentage of Voluntary Support by Individuals*

1969-70	27.3%	5.0%	1974-75	27.5%	7.9%

As indicated in Table 4a, there was a decrease of $54.3 million, or 20.0%, in the value of bequests reported in 1974-75. As a percentage of total voluntary support, bequests fell from 15.3% in 1973-74 to 12.8% in 1974-75, the lowest level since 1967-68. In relation to support from individual donors, bequests declined from 32.2% of the total in 1973-74 to 27.5% in 1974-75. Although all classes of educational institutions except private men's colleges and two-year colleges reported decreased bequests, the major private universities accounted for more than half of the dollar decline. Since securities and other property typically comprise about two-thirds of the value of bequests, the dollar decrease in 1974-75 appears more to be a result of a lower valuation reflecting stock market conditions than to a decline in the number and size of bequests.

Deferred giving in the form of life income contracts were reported to have increased by 7.6% in 1974-75. All of this increase, however, was accounted for by one gift by one individual to one institution.

The book value of endowment funds reached a new record high of $11.1 billion, up 1.3% from 1973-74. However, this gain may reflect only the increase in the number of reporting institutions. The market value of endowments rose 11.0% in 1974-75, despite a decline in the number of reporting institutions.

Private Secondary and Elementary Schools

THE SURVEY RESULTS

A total of $79.6 million was reported by 272 schools in the 1974-75 Survey, as opposed to $101.0 million by 313 schools in 1973-74. The overall dollar support decline of 21.1% is made up in part by the decline in numbers of schools reporting, and in part by decreased capital giving. Support for current purposes for the 272 schools reporting in 1974-75 was $34.3 million, as opposed to $36.2 million for the 313 schools in 1973-74.

For the 272 schools that reported in 1974-75, alumni support of the Annual Fund was slightly higher than was reported by 313 schools for 1973-74, despite a smaller number of reported donors. Consequently, the average alumni gift to the Annual Fund rose 12.2% in 1974-75; the participation rate, at 23.3% of those solicited, was unchanged from 1973-74.

Overall alumni support, as reflected by 207 schools that reported in both 1973-74 and 1974-75, decreased 26.6%, but this reflects a decline in capital support of roughly 40% which was partially offset by a gain of 10% or more in support for current operations. There was a 4.0% decrease in total support from non-alumni individuals, most of which reflects a decrease in capital giving.

The 207 schools reported corporate support up only slightly but a gain of 10.8% in foundation support and a significant gain of 22.2% from "other" sources which typically account for only 3% of overall support.

The ten schools reporting the largest support totals in 1974-75 were:

DEERFIELD ACADEMY (MASS.)	$2,424,890	PHILLIPS EXETER ACADEMY (N.H.)	$1,399,668
HOTCHKISS SCHOOL (CONN.)	1,870,103	GROTON SCHOOL (MASS.)	1,312,938
PHILLIPS ACADEMY (MASS.)	1,495,519	HARLEY SCHOOL (N.Y.)	1,269,879
CHOATE ROSEMARY HALL (CONN.)	1,486,184	HILL SCHOOL (PA.)	1,211,967
KINKAID SCHOOL (TEXAS)	1,421,595	ST. PAUL'S SCHOOL (N.H.)	1,111,021

For all schools reporting, the relative importance of capital support declined from 64.2% of the total in 1973-74 to 56.9% in 1974-75, a reflection of the fact that capital support declined 30.1% in dollar amount. In addition to a 54.6% decline in the reported value of bequests, there was a marked decrease in deferred giving.

Endowment funds decreased, both in book value and in market value, but some or all of the decrease reflects the decrease in the number of schools reporting:

Note: The year-to-year changes shown in this table are not all of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fund-raising drives, the timing of corporate and foundation programs, large bequests and other non-recurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

[1] In every Survey, each institution is classified in the category appropriate to its status in that year. Since the status of many institutions has changed over the years, the data by category is not strictly comparable from one Survey to another. See Page 6 for a comparison of 1973-74 and 1974-75 data on an adjusted basis.
